

BVFF FIXED FLANGE LARGE BORE

3000/6000 PSI – DM-Flange, ANSI, DIN

*Uses non-SAE high strength flanges for high working pressures ~ Sizes from 2½" to 6"
Standard with bolt-on DM-Flange, optional ANSI/DIN flange ~ Custom order to 12"+*

The BVFF family comprises aluminum, steel, and stainless steel versions, enabling DMIC to furnish large valves to any ANSI or DIN/ISO Flange standard. In return, this is a cost effective way of achieving the compatible connection, pressure rating, and sealing/ material specification. Standard BVFF valves are equipped for either DMIC DM (3,000 PSI) or DH (6,000 PSI) flange connections. ANSI and DIN/ISO valves are pressure rated according to the class standard.

- **Superior Field Proven Design** features Large bore, durability, and fast spare parts available from our US factory
- Delrin™ Ball Seals and Buna-N elastomer seals standard. All DMIC sealing and valve material options available for wide fluid compatibility range.
- **Complete array of DMIC pre-engineered accessories** including lock kits, position sensing, and actuation compliment your project.
- These valves **cannot** be opened under pressure unless the pressure balance option is installed.

Specifying ANSI or DIN Flanges

DMIC's **BVFF** Ball Valve family is ideal for systems specifying ANSI or DIN flanged connections. Because our designs span three target pressure ranges, there is always a cost effective valve for your requirement. DMIC's flexible ordering system allows any flange standard to be applied to any valve sufficiently pressure rated. *When specifying ANSI or DIN Flange models, please request the latest dimensional print.*

Fixed Flange Valves larger than 6"

An emerging market for DMIC is the manufacture of very large valves for process, petrochemical, and pipeline installations. If your organization is open to possible substantial savings, consider partnering with DMIC on your next large scale project with sizes up to and beyond 18" made in our U.S. factory.

Note: Changes from Standard Materials may result in changes to temperature and/or pressure rating.
